## Section 1 – Conflict Minerals Disclosure

### Item 1.01 Conflict Minerals Disclosure and Report

AMETEK, Inc. (the “Company”) has evaluated its current product lines and determined that certain products the Company manufactures or contracts to manufacture contain tin, tungsten, tantalum and/or gold (3TG). As a result, the Company has filed a Conflict Minerals Report, which appears as Exhibit 1.01.

The Conflicts Mineral Report is available at [www.AMETEK.com/conflictmineralsreport](http://www.AMETEK.com/conflictmineralsreport). The content of any website referred to in this Form SD is included for general information only and is not incorporated by reference in this Form SD.

### Item 1.02 Exhibits

AMETEK, Inc. Conflict Minerals Report as required by Item 1.01 of this Form.

## Section 2 - Exhibits

### Item 2.01 Exhibits

<u>Exhibit No.</u>	<u>Description</u>
<a href="#">1.01</a>	<a href="#">Conflict Minerals Report of AMETEK, Inc. for the year ended December 31, 2020 as required by Items 1.01 and 1.02 of this Form.</a>

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

AMETEK, Inc.

Date: May 26, 2021

By: /s/ RONALD J. OSCHER

Name: Ronald J. Oscher

Title: Chief Administrative Officer

**AMETEK, Inc.**  
**Conflict Minerals Report**  
**For the Year Ended December 31, 2020**

The report for the year ended December 31, 2020 is presented to comply with Rule 13p-1 under the Securities and Exchange Act of 1934 (the "Rule"). The Rule was adopted by the Securities and Exchange Commission ("SEC") to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act"). The Rule imposes certain reporting obligations on SEC registrants whose manufactured or contracted to manufacture products contain conflict minerals which are necessary to the functionality or production of their products. Conflict minerals are defined as cassiterite, columbite-tantalite, gold, wolframite, and their derivatives, which are limited to tin, tantalum, tungsten, and gold ("3TG"). These requirements apply to registrants whatever the geographic origin of the conflict minerals and whether or not they fund armed conflict.

If a registrant can establish that the conflict minerals originated from sources other than the Democratic Republic of the Congo ("DRC") or an adjoining country (the "Covered Countries"), or from recycled and scrap sources, they must submit a Form SD which describes the Reasonable Country of Origin Inquiry ("RCOI") completed.

AMETEK's products are "DRC Conflict Undeterminable." The report presented herein is not audited.

### **Overview**

AMETEK consists of two business groups: Electronic Instruments Group and Electromechanical Group. Electronic Instruments is in the design and manufacture of advanced instruments for the aerospace, power, process, and industrial markets. Electromechanical is a differentiated supplier of electrical interconnects, precision motion control solutions, specialty metals, thermal management systems, and floor care and specialty motors.

The electronic instruments and electromechanical products we manufacture are numerous and many are complex, from direct and indirect suppliers. AMETEK has relationships with a vast network of suppliers (over 17,000 direct and indirect suppliers) throughout the world and there are generally multiple tiers between the 3TG mines and our direct suppliers. Based on our downstream position in the supply chain, we must rely on our direct suppliers that may themselves procure these minerals far removed from the actual source making it difficult to determine the 3TG country of origin, chain of custody, and whether these minerals directly or indirectly financed or benefited armed groups in the DRC or covered countries.

In 2020 AMETEK continued the previous year's focus on suppliers providing at least \$300K of parts annually. The data collection process was supported with the use of an outside consultant to assist with data collection and collation efforts. Although most of our suppliers provided the information requested, some did not. Some suppliers responded with a specific Conflict Free Mineral ("CFM") status without providing supporting details. AMETEK will continue to diligently pursue receipt of satisfactory and conclusive details regarding the supply chain of conflict minerals our Suppliers are providing to us. For the period ending December 31, 2020, our CFM efforts resulted in the following Conflict Minerals Metrics for our entire organization, regardless of supplier spend.

**2020 CFM Status by Spend**

<b>CONFLICT FREE</b>	<b>12%</b>
<b>EXEMPT</b>	<b>67%</b>
<b>UNDETERMINABLE</b>	<b>16%</b>
<b>UNKNOWN</b>	<b>5%</b>

For the next reporting year (2021 production), AMETEK's focus will continue to be on increasing our suppliers' response rates to our request for complete and accurate Templates with the ultimate goal of achieving a conflict-free supply chain. The remainder of this report will provide the supporting details of our Conflict-free Minerals due diligence approach and results for the 2020 production year.

**Conflict-free Minerals Due Diligence Program**

Pursuant to the Rule, we performed due diligence on the source and origin of 3TG in our products, including the Components we purchase from suppliers. Our due diligence measures have been designed to conform to The Organisation of Economic Co-operation and Development ("OECD") due diligence framework. This risk-based due diligence process is based on the following OECD Guidance:

1. Establish strong company management systems
2. Identify and assess risk in the supply chain
3. Design and implement a strategy to respond to identified risk
4. Carry out independent 3<sup>rd</sup> party audit of the supply chain (e.g., audit high risk suppliers or smelters)
5. Report on supply chain due diligence internally to management

In order to identify and assess risks associated with CFM we begin with careful filtering of our products to isolate those that may contain 3TG that is necessary to the functionality or manufacture of our products. A categorization of suppliers and individual components purchased is in place that results in every purchased item having a CFM status assigned. We are then able to identify and engage relevant suppliers by initiating a RCOI to determine whether supplied parts containing 3TG originated in the DRC or one of the covered countries or are from recycled or scrap sources.

Given the number of products impacted and the complexity of the associated supply chains, our RCOI involves numerous telephone and email inquiries along with the exchange of thousands of CFM Templates and other supporting documents. To effectively manage this process, a CFM compliance owner has been identified for each of our 153 factory locations. The Compliance Owner is tasked with ensuring responses from their supply base. For the 2020 production year, AMETEK continued to employ an outside consultant to load the targeted suppliers and their contacts, validate, and review submissions.

An additional data gathering challenge has been to obtain complete CFM data from companies that currently are not part of the direct SEC reporting regulations. Included in this Group are Smelters/Refiners, Distributors, and private or internationally based companies. For the 2020 production year, AMETEK chose to continue to focus on our Tier 2 supply, defined as suppliers providing at least \$300K of parts annually. This allowed us to strategically align our efforts to a controlled number of companies in the best position to participate in our CFM data gathering efforts. Our process to address non-responders contained specific escalation procedures including business unit meetings with corporate management until an appropriate supplier response was received. Additionally, AMETEK employed

outside consultants to assist with gathering supplier CFM Templates and confirmation of the validity of their Smelter lists. After considerable effort, we have received CFM responses from 735 of our Tier 2 suppliers. For 2020, the key metrics from our Tier 2 group of suppliers are as follows:

#### 2020 Tier 2 CFM Status by Spend

<b>CONFLICT FREE</b>	<b>15%</b>
<b>EXEMPT</b>	<b>71%</b>
<b>UNDETERMINABLE</b>	<b>14%</b>
<b>UNKNOWN</b>	<b>0%</b>

#### Conclusions and Expected Next Steps

To the extent reasonably possible, AMETEK has documented the country of origin of identified smelters and refiners based on information received through the Conflict-Free Smelter Program ("CFSP"), surveys of smelters and refiners, the validation of outside consultants, and/or reviews of publicly available information. We have identified a total of 328 legitimate and known smelters as potential sources of 3TG minerals furnished to AMETEK Suppliers during 2020 (see Appendix I). AMETEK, Inc. intends to continue to evaluate and improve our due diligence program and engage with our suppliers to identify the origin and chain of custody of 3TG minerals in our products with an aim to achieve a Conflict Free Supply Base.

#### Caution Concerning Forward-looking Statements

Certain statements in this report maybe "forward-looking" within the meaning of the Private Securities Litigation Reform Act of 1995. When used in this report, the words "believes," "anticipates," "may," "expect," "intend," "estimate," "project" and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain such words. Examples of forward-looking statements include statements relating to our future plans, and any other statement that does not directly relate to any historical or current fact. Forward-looking statements are subject to various factors and uncertainties that may cause actual results to differ significantly from expectations. A detailed discussion of other factors that may affect our future results is contained in AMETEK's filings with the U.S. Securities and Exchange Commission, including its most recent reports on Form 10-K, 10-Q and 8-K. AMETEK disclaims any intention or obligation to update or revise any forward-looking statements.
